

Elixir style: source comparison

Generated with Elixir 1.19.5. A guide column shows "Yes" where it proposes the rule; the mix format column shows "Enforced" where the formatter applies it automatically. 31 master rules. Proposed by no source:

alphabetical alias order

Sources a mix format = mix format; Lexmag = Lexmag's Elixir Style Guide; Credo = Credo's Elixir Style Guide; Adams = The Elixir Style Guide.

Rule	mix format	Lexmag	Credo	Adams
Spaces around binary operators	Enforced	Yes	Yes	Yes
No spaces around the range operator	Enforced	Yes		Yes
Two-space indentation		Yes	Yes	
Maximum line length			Yes	Yes
No trailing whitespace		Yes	Yes	Yes
Space after commas	Enforced	Yes	Yes	Yes
No spaces inside brackets	Enforced		Yes	Yes
No semicolons between statements	Enforced	Yes	Yes	
No trailing comma in collections	Enforced	Yes		
Collapse consecutive blank lines	Enforced			
Space after the comment marker	Enforced	Yes		Yes
Group digits in large numbers	Enforced	Yes	Yes	
Uppercase hexadecimal literals	Enforced	Yes		
Unix line endings	Enforced		Yes	Yes
Trailing newline at end of file		Yes	Yes	Yes
snake_case for atoms, variables and functions		Yes	Yes	Yes
CamelCase for modules		Yes	Yes	Yes
Question mark for predicate functions		Yes	Yes	Yes
Avoid one-letter variable names		Yes		
Order alias/import/require alphabetically				
Use the __MODULE__ pseudo-variable		Yes	Yes	Yes
Consistent module attribute layout		Yes		Yes

Rule	mix format	Lexmag	Credo	Adams
Use pipelines for chained calls		Yes		Yes
Avoid needless pipelines		Yes		Yes
No anonymous functions in pipelines		Yes		
No else clause with unless		Yes	Yes	Yes
Use true as the last cond clause		Yes		Yes
Parentheses on zero-arity function calls		Yes		Yes
Error suffix for exception modules		Yes	Yes	Yes
Lowercase exception messages		Yes		Yes
No trailing punctuation in exception messages		Yes		Yes
